

# ACADEMIC ADVISING EXPERIENCE

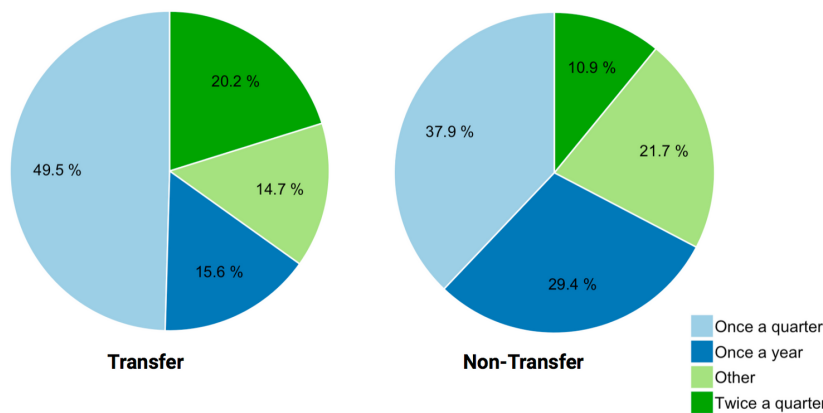

## FREQUENCY

The majority of students meet with their advisors at least once a quarter. However, fifth+ years meet with their advisors more frequently than any other cohort.

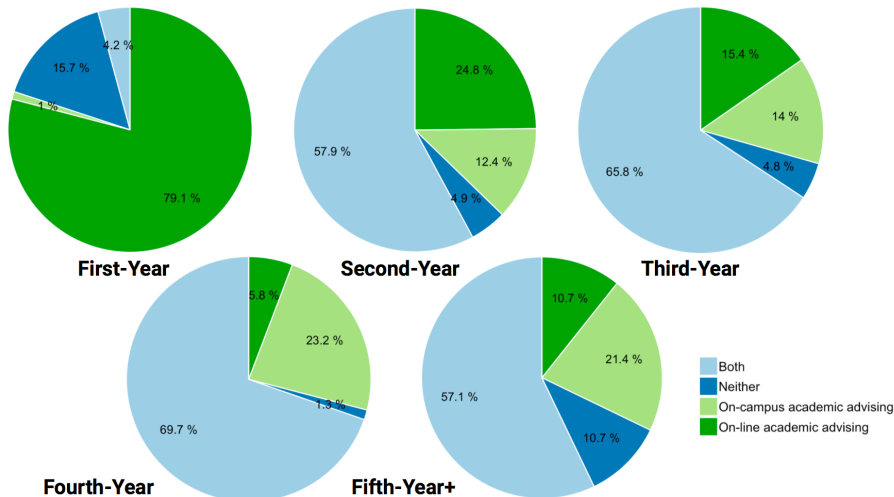

## TRANSFER STUDENTS

The majority of transfer students meet with their advisors more often than non-transfer students. This is evident in that about 20.2% of transfer students meet with their advisor twice a quarter.

## LOCATION

Unsurprisingly, the majority of first years received academic advising in an online environment. The rest of the cohorts have mostly received academic advising both online and on-campus.

## ACCESSIBILITY

The majority of students, regardless of cohort, rank the accessibility of their advisor between 8 and 10.

On a scale of 1-10, how accessible would you say your advisor is?

(1= not accessible at all, 5= somewhat accessible, 10= very accessible)
